

Our native tongue is IT...

RHN of Oklahoma wants to serve as your Information Technology partner. What this means to you is a full-service IT staff that provides only the services you need or want.

This includes:

- Daily IT operations
- Troubleshooting
- Maintenance and user support
- New or existing software/hardware installation and maintenance
- Wired/wireless network support
- Consulting for new hardware and software purchases

we provide.

New or Existing Software/Hardware Installation and Maintenance

RHN's IT specialists will assist with updating existing software, installing new software or hardware, and software and hardware maintenance.

This may include but is not limited to:

- Operating systems
- Office productivity applications
- Internet and network security software
- Various office specific software
- Workstation PC's, laptops, servers, LANs (local area networks) and wireless networks

Contact us for a no-obligation consultation.

Mike Turner, IT Specialist

Office: 580.286.6688, ext. 145

Cell: 580.372.4297

Assist with Transition to Electronic Health Records (EHRs) and/or Database Management

If your facility is considering transitioning to an EHR system, or has a patient records database, RHN's IT specialists can help in the facilitation, transition and maintenance of such systems. Since IT lingo is a foreign language to many, it is helpful to have someone there who can assist in this process.

RHN's IT specialists can also communicate with manufacturer support staff during all phases of the process, including: development, implementation and maintenance.

IT consulting for new hardware or software projects

If your facility is considering a new hardware or software project, we can offer consulting for your project from the beginning stages of product research to final implementation.

Daily IT Operations, Troubleshooting, Maintenance and User Support

RHN's IT specialists will assist office staff with daily IT operations, troubleshooting, and user support.

We will help office staff with problems that may occur on any given day.

If a staff member needs help with Excel, has trouble transferring files, connecting to a network printer, gets a virus on their workstation computer, or any other IT issues that may come up on a daily basis, we are here to help.
